ELECTRIC RESCUE

If a patient collapses due to ELECTRIC shock, unplug the plug or wrench the cable non-conducting end. Do not touch the patient. Push the circuit breaker.

Check Casualty Response

If unconscious, open the airway and check for normal breathing (for up to 10 seconds)

If the casualty is breathing, place in the recovery position. dial 999 for an ambulance monitor and record breathing every ten minutes or until medical assistance arrives.

If Casualty is Not Breathing Normally

If the casualty is not breathing normally, dial 999 immediately and commence CPR.

Commence CPR

Commence CPR. Alternate 30 chest compressions with two rescue breaths. Repeat this sequence as necessary.
